UV-C ELEVATOR

UV-C air Purifier

UVC ELEVATOR is designed for air disinfection compatible with human presence. High-dose UVC lamps and high-CFM fan in the enclosed chamber and continuously clean the air, which not only reduces the spread of infectious aerosols in the air, but also recirculates the clean air back to the room.

The fan draws the air into the elevator, the powerful UV-C ray will inactivate the germs, fungi and virus etc., then the clean air will be pushed out.

Applications: hospitals, hotels, restaurants, office buildings.

BENEFITS

- Work in an environment free of harmful microorganisms.
- Continuous protection throughout the operation of the equipment.
- Eliminate the chances of getting sick due to microorganisms present in the air.
- Breathing fresh and clean air protects children and people with allergies.

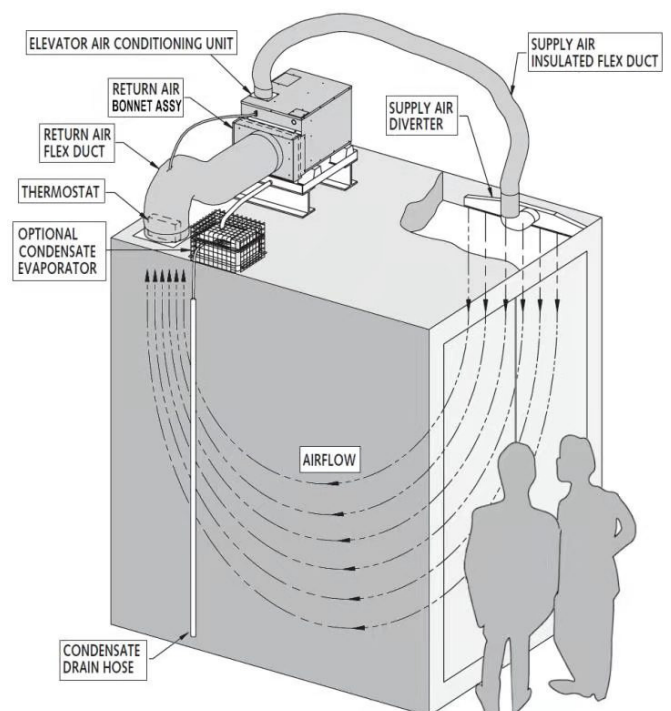

ADVANTAGES

- Disinfection without chemicals or ozone.
- Silent functioning.
- Adjustable fan speed.

FEATURES

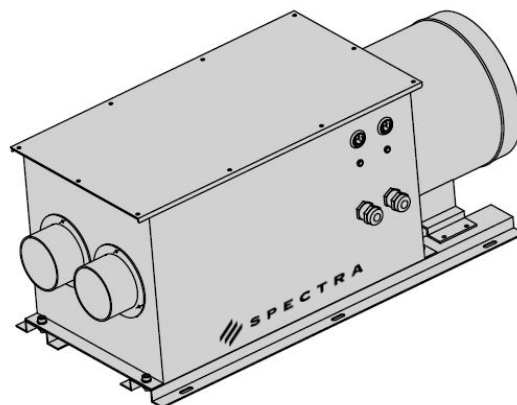

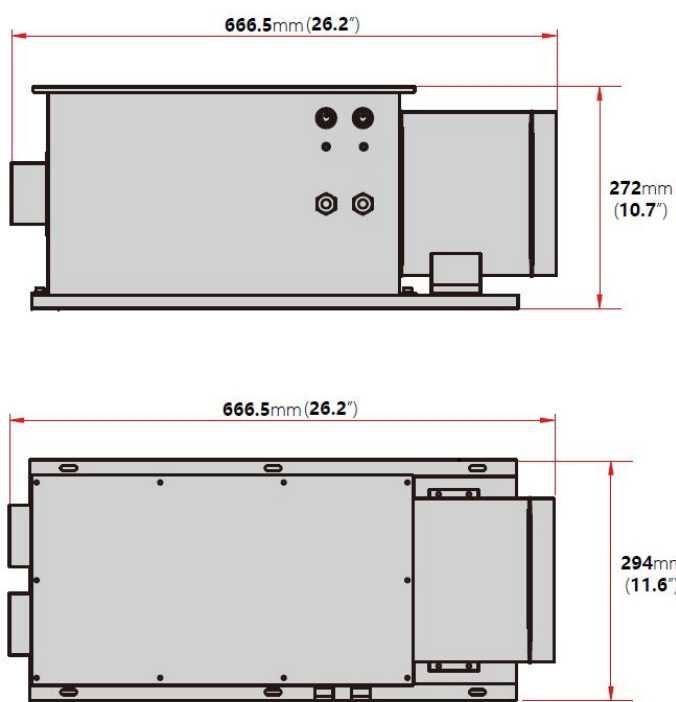

- Air disinfection is done by recirculation and is done safely in the presence of humans.
- Eliminates up to 99.99% of viruses, bacteria and molds.
- Active disinfection 24 hours a day.

TECHNICAL SPECIFICATIONS

MODEL	UVC ELEVATOR
POWER	36 W
VOLTAGE	110-120V AC, 50/60Hz / 220-240V AC, 50/60Hz
LAMP QUANTITY	2 lamps
TOTAL UV IRRADIANCE	110 μ W/cm ² @ 1 Meter
TOTAL UV OUTPUT	12 W
TREATED AIR VOLUME	1530 m ³ /h
LAMP LIFESPAN	Min. 8000 hours
NOISE LEVEL	30-70 dB
OVERALL DIMENSIONS LXWXH	666.5 x 294 x 272
WEIGHT	15 Kg
FILTER	HEPA
MOUNTING	Bracket
REMOTE CONTROL	On/Off and fan speed controller
